

Advice to apply for Professional Engineers-International (Main Points) of The Institution of International Professional Engineers

Society of Professional Engineers (UK) established in 1969 as a part of Society of Engineers (UK) (1854) can register and issue Professional Engineers (UK) recognized by British Government and is also recognized in other Commonwealth Countries.

But in 2018 April, when Society of Professional Engineers UK merged with The Institution of Engineering and Technology without seeking the votes of its international members, the SPEUK International Members establish new Society of Professional Engineers UK and International to maintain their designation PE(UK) in the new form of PE(UK and International) and all PE(UK) certificates hold by all SPEUK members are still valid but we will issue the new form of PE(UK and International) Certificate by electronic mode only.

There should be noted that Society of Professional Engineers UK and International will not follow the constitution of Society of Professional Engineers UK, it is not another form of Society of Professional Engineers UK and it does not declare that the new membership which we will issue after formation of Society of Professional Engineers UK and International

is associated with former Society of Professional Engineers UK but the members whom were admitted by former Society of Professional Engineers UK are still LIFE MEMBERS of the new Society of Professional Engineers UK and International and as our task is to maintain our dignity, no membership fees is payable by such members.

In February, 2019, The Society of Professional Engineers (UK and International) was renamed as The Society of Professional Engineers (International) and updated to The Institution of International Professional Engineers (IIPE).

Membership of Society of Professional Engineers (International) and Professional Engineer (International) can be applied for by having undergone the assessment by its recognized associations which will be advised when we receive your application.

The following is the way to achieve the Member of Society of Professional Engineers (International)(MSPE(International) and

Professional Engineer (International) (PEng(International)).

The application process consists of Proposer and Seconded's signs and two Members of Society of Professional Engineers (International) and Professional Engineer (International) in membership committee can sign the application form . Such nomination will be done by our administration office when we receive your application form and relevant documents.

Graduate Technical Engineer (Grad TEng(International)for Graduates who complete Diploma and BTech Courses and Graduate Professional Engineer

(Grad PEng(International))Grades for Graduates who complete BE courses.

(4) Fill Society of Professional Engineers Membership/ Application for Professional Engineers Registration Form

(5) Please send the documents in step 1 to 4 to

thespeukinternational@gmail.com

(6) We will assess your design by ourselves or refer your design to our authorized assessor and advise you how to pay the assessment fees to such assessor.

(7) In some cases, we will eliminate such fees at our discretion.

When you have paid the fees, you need to forward the evidence to thespeukinternational@gmail.com and upon receipt, we will send your design (Step 3) to the assessor.

(8) When we get back the assessment result, we will advise you of outcome and our officers sign as Proposer on the Society of Professional Engineers Membership/ Application for Professional Engineers Registration Form

Then send this form together with your documents to Membership Committee to the branches or central administration to the following e mail address

thespeukinternational@gmail.com

(9) When the membership committee approves your application, we will issue you Professional Engineers (International)Certificate electronically. You need to print out in colour on A4 white paper and laminate it. We will maintain the Register of our Professional Engineers (International) and will answer any enquiry regarding verification.

Apart from fees payment to assessor if required, no fees is payable to issue the Certificate electronically.

Annual fees may be charged or may not be charged to new members at the discretion of the membership committee. In this case, all members whom were admitted without charging the membership fees will not be charged membership fees but in the case of the fees system is changed, the new members effected by such change will need to pay the fees.

It is to be advisable that the applicants will need to carefully read the above facts and only submit the application if they agree to them.

(10) All former SPEUK members will just need to send your membership numbers to us for our new register. Their MSPE.FSPE.SPE(UK) Certificates are valid and no new certificate will be issued unless loss of certificate but the new certificate will be in the format of SPE(International) Not SPE(UK) and it can only be issued by electronic mode. Your SPE-UK Membership number is also SPE International of The Institution of International Professional Engineers Membership Number.

Regards,
Dr Peter Prasad
