

INSTALLATION INSTRUCTIONS

www.seavusprojectviewer.com

Installation Instructions

After you have downloaded the setup, start the installation by double-clicking the setup file in Windows Explorer or use the “Run” command from the Start menu.

Note: Before you start the setup, you should check the section "System Requirements" in the “User Manual” document for information about the minimal hardware and software configuration required to run the product.

Note: You should have Administrator privileges during installation of the application.

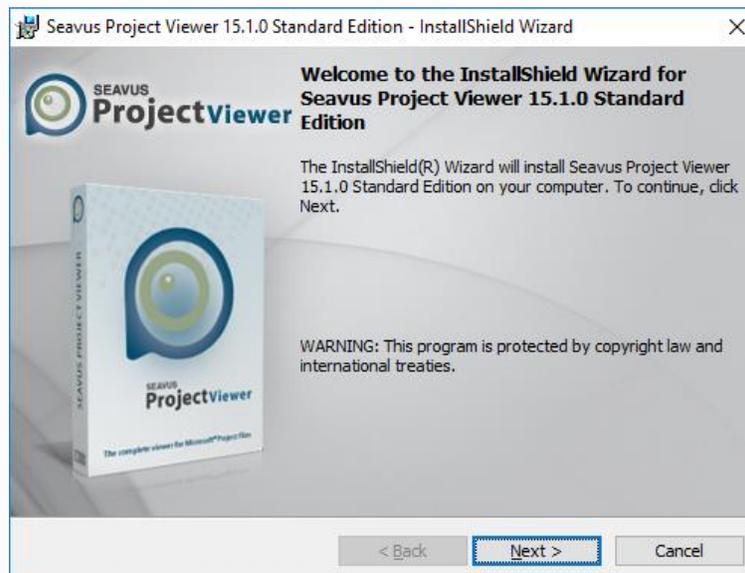

STEP 1) SETUP INITIALIZATION

Once the setup is initialized and the initialization dialog appears; the Setup wizard will automatically continue with the installation.

Note: Click the Cancel button if you wish to exit the installation.

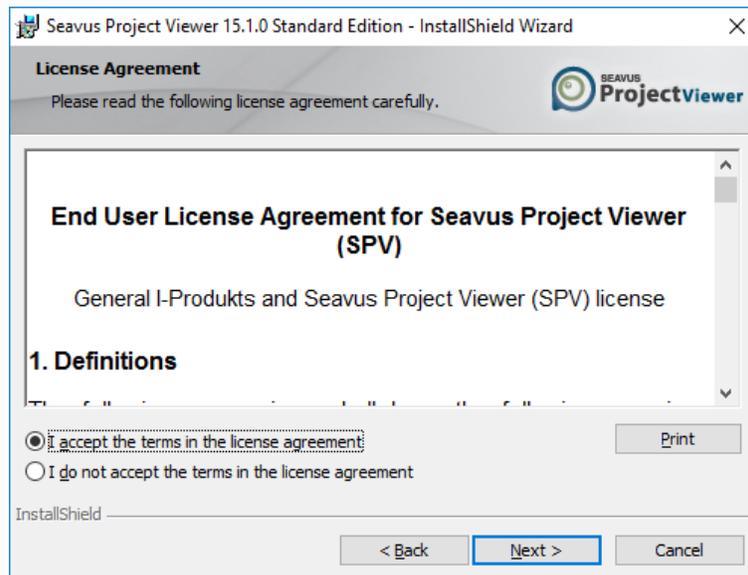

STEP 2) SETUP WELCOME

After the initial preparations for installation; the setup wizard will show you the Welcome dialogue. You should click the Next button if you want to continue with the Setup, or Cancel if you want to exit the wizard.

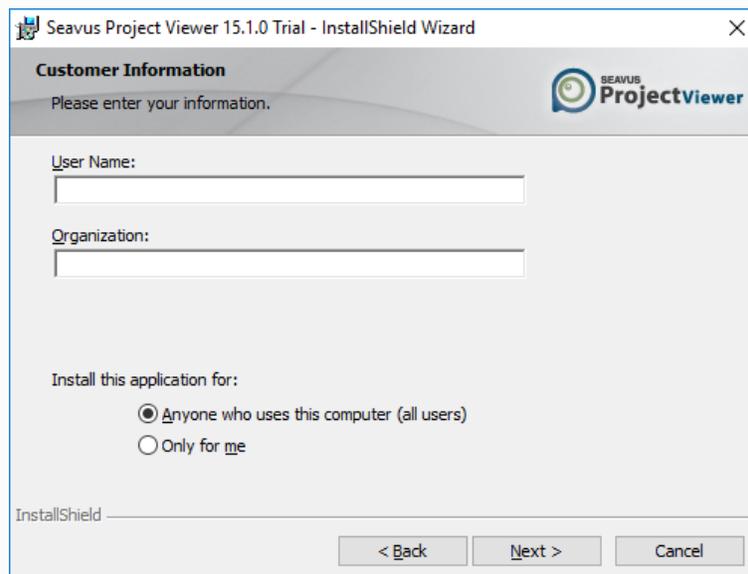

STEP 3) LICENSE AGREEMENT

The license agreement shows the End User License Agreement for the product. Please read it carefully, and click the “I accept the terms in the license agreement” radio button. Click the Next button if you agree with the License agreement and want to continue with the Setup; or click the Cancel button if you disagree with the License agreement and want to exit the installation wizard.

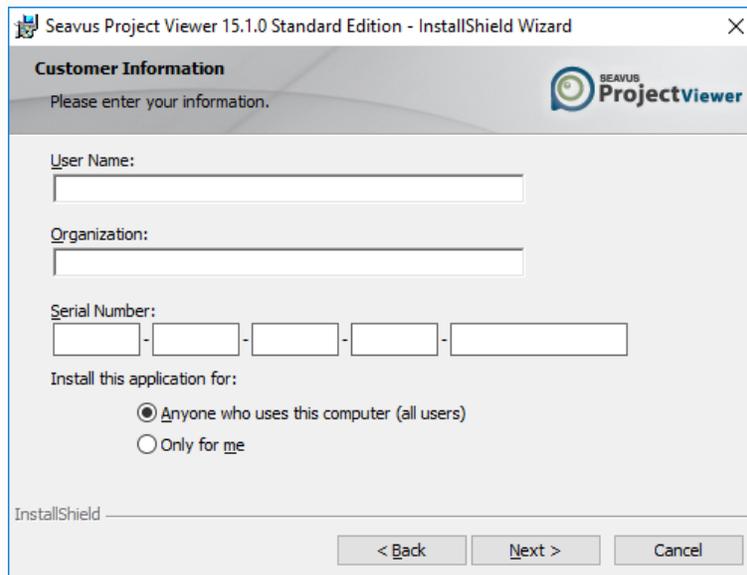

STEP 4) CUSTOMER INFORMATION

This dialog box collects the information about the user who performs the installation, and if the install is only for the current user or for all users of the PC.

In case of installing the Standard version, in this dialog the user enters his purchased License Key information - the Serial Number. You must insert the correct serial number if you want to continue the Setup, otherwise you will not be allowed to install the product on your computer / server.

STEP 6) SETUP OPTIONS

For Trial version you can select which shortcuts should be placed for the application and whether you want to test the Task Update feature:

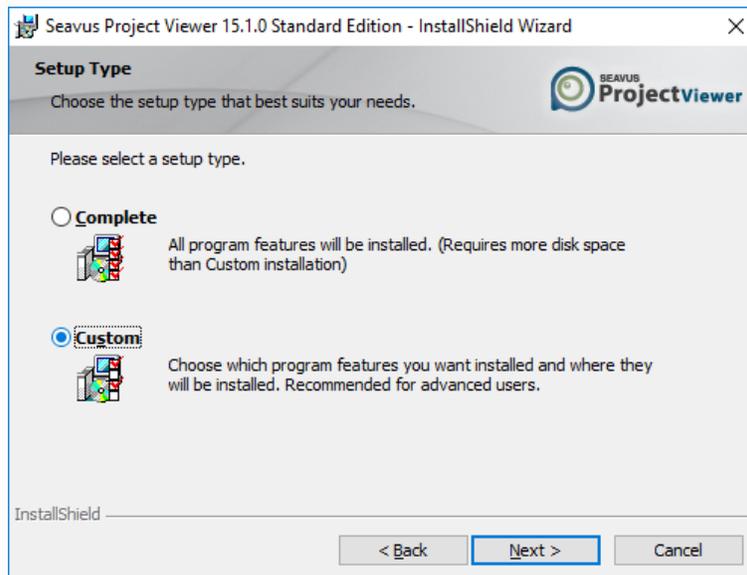

In case of Standard version installation, here you can additionally choose whether you want to associate all MPP files with Seavus Project Viewer™.

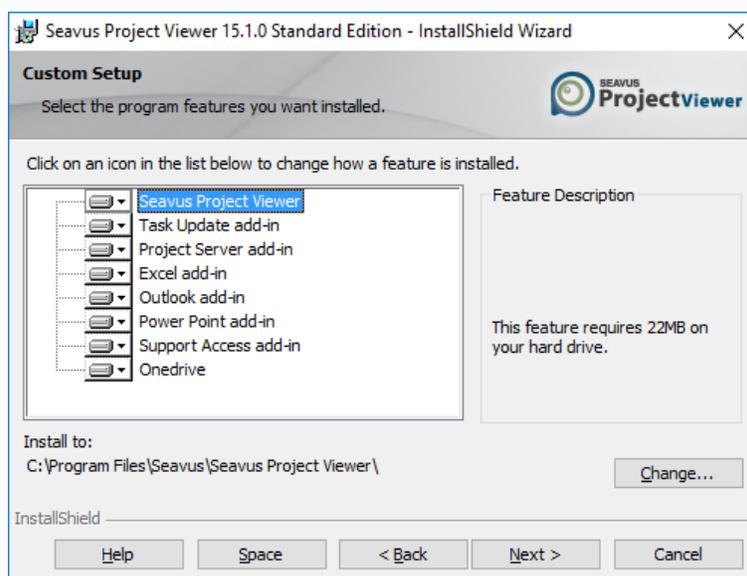

STEP 7) SETUP TYPE

Complete option will install it on the default location with all components.

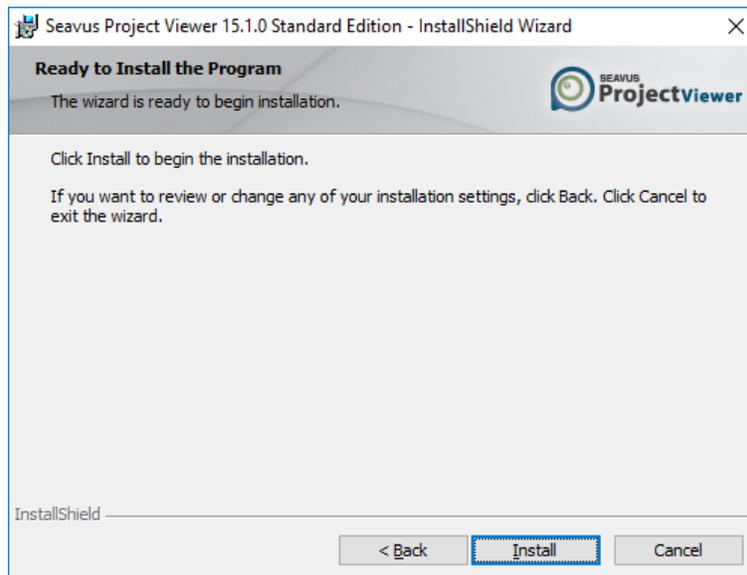

Selecting the Custom type of installation gives you an opportunity to choose where the product will be installed and which components will be installed.

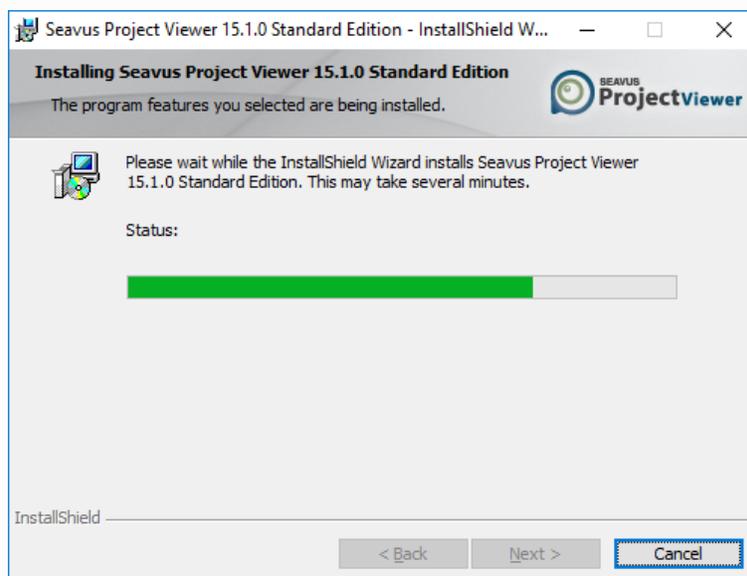

STEP 8) READY TO INSTALL THE PROGRAM

When you finish with all previous settings in the Setup screens, you are only a few steps from installing Seavus Project Viewer™ on your computer/server. If the settings are ok, you can click the Install button to start the installation.

STEP 9) INSTALLING THE PROGRAM

After you have clicked the Install button, the installation of the product will start. Once the installation dialog appears, you have the option to stop the installation by clicking the Cancel button. Cancelling the installation process will roll back the installation and remove all the data related to this product.

STEP 10) SETUP COMPLETED

If the installation was successful, the Installation Completed dialog box will appear informing you that the product is successfully installed on your computer/server. Click the Finish button, the complete the installation process.

Activation Instructions

When Seavus Project Viewer™ Standard Edition is installed on your computer, you must activate it in order to be able to use it. If it is activated once, the product does not require activation any more.

Note: Trial setups are different from the Standard. They do not require any activation.

Note: The Trial version cannot be activated with Standard Key. If you have had a Trial version, you must uninstall it first, then download the Standard setup and install that one.

Note: In order to be able to activate Seavus Project Viewer™, you must be logged on as user with Administrator privileges on your computer.

The activation can be performed on following ways:

- Using your Internet connection – Seavus Project Viewer™ is contacting our secure Activation Centre using https protocol and receives the activation key.
- Contacting our Customer Service representatives via telephone (+389 2 30-94-061 and +46 40578 883 for Europe and 1 888 573 2887 for Americas), or via email (support@seavusprojectviewer.com)

If you decide to use the activation by contacting our Customer Service representatives a dialog that shows License ID and Hardware ID will appear. You should read these two IDs to our customer service representative if you are using a telephone for communication, or to send these IDs over the email to the email address stated above. You will get back the confirmation ID from our customer service representative, immediately if you are using telephone or for maximum one working day if you are using email communication.

The confirmation ID must be inserted into fields marked with A, B, C, D, E, F, G and H, and then you should press Next button to finalize the activation. If the confirmation ID is inserted correctly, the

product will be ready for use, but if the confirmation ID is not correct, you will get a message that will tell you that the activation is unsuccessful.

Note: You should write down your License ID and store it in a safe place. The License ID will be the only identification that you are authorized user of the Seavus Project Viewer™ product.

Note: If you reinstall the operating system on your computer or change the computer components, or the entire computer, which will require a new installation of the product, you must reactivate the Seavus Project Viewer™ application. This means that you must contact our Customer Service representatives on the contact phone provided above and explain the reason for reinstallation of the viewer. After that you will get a new the confirmation ID which will activate your version of Seavus Project Viewer™.

If you only reinstall Seavus Project Viewer™, no reactivation is required.

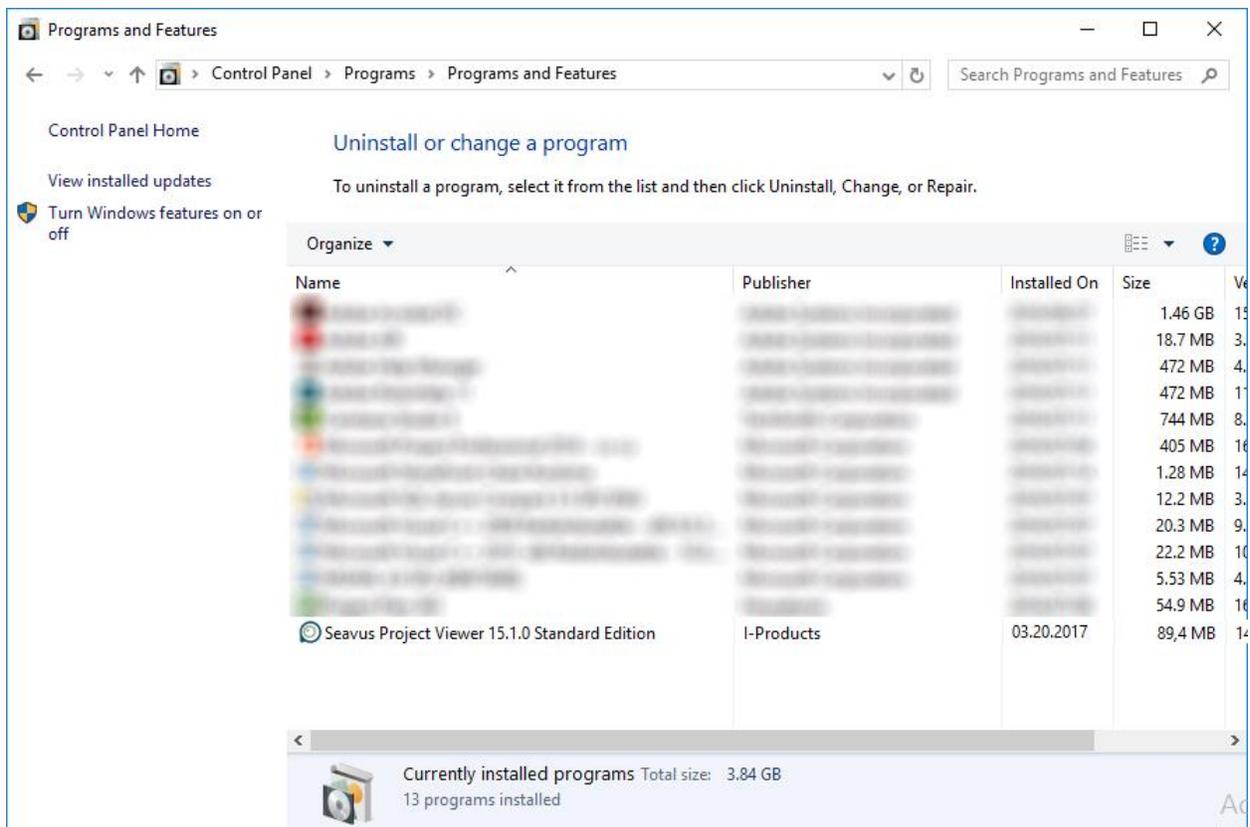

Uninstalling Seavus Project Viewer™

There are several ways for uninstalling software from the PC. In the next steps, the most used routine for uninstalling application from PC will be described.

Note: Before you start the Seavus Project Viewer™ uninstallation process, you should consult with your IT personnel whether you are allowed to uninstall the software as well as the level of permissions that are assigned to your account.

STEP 1) CONTROL PANEL

For uninstalling Seavus Project Viewer™ you have to go to the Control Panel and in the Programs section select the “Uninstall a program” feature. Once this option is clicked, new window will appear presenting a list with all applications that are installed on your PC.

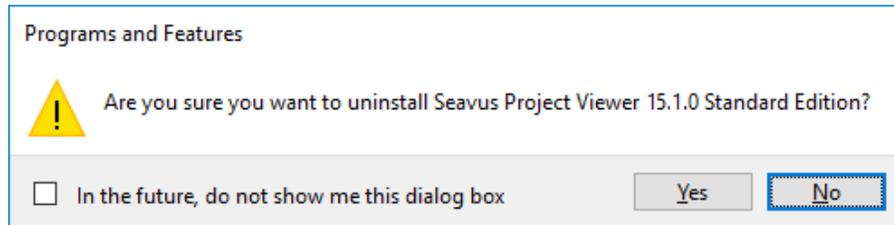

STEP 2) START UNSINSTALL PROCESS

Scroll down and find the Seavus Project Viewer™ application. Select it and click on the “Uninstall” button, located at the top of the list.

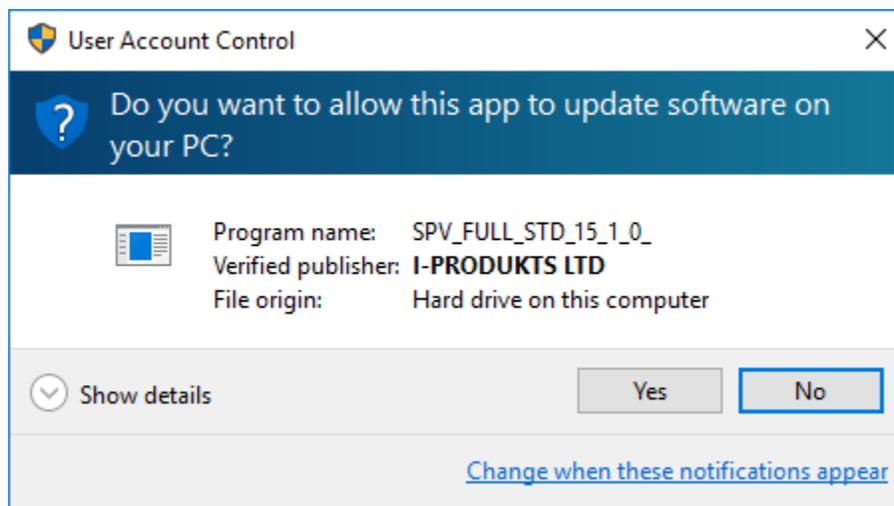

STEP 3) CONFIRM UNINSTALLATION

Before starting the uninstall process, operating system will pop-up notification asking you whether you are sure with the intention to uninstall the software. Clicking on the Yes button will cause to continue the process. Otherwise, the installation process will be canceled.

STEP 4) USER ACCOUNT CONTROL

Uninstalling Seavus Project Viewer will cause changes your PC, and these changes will require administrator – level permission. The User Account Control (UAC) will notify you and gives you the chance to approve the uninstallation. After confirming the change that are going to be made on your PC, the uninstallation process will continue and end in few seconds.
