Supporting Company

Ms Mary Mon

Mon Group Sydney Pty Ltd

PO BOX 227, Marrickville, NSW1475, Sydney, Australia

Our management system will be largely de-centralised because in the past, the Executive Committee located in UK only determined the fate of the society and without having the votes of the international members, it merged the society to IET resulting the risk of losing the PE title by all of us.

It is important for us to prevent such unpleasant thing forever in the future.

For this reason, the following administration system of central administration and branch administration located in countries of the World will be established.

Tasks of the Central Administration of The Society of Professional Engineers (UK and International)

- Accepting the former Society of Professional Engineers (UK) Members to be given life membership and register
- Issuing the membership admission procedures.
- Developing the format of Membership Certificates which can be issued by each branch located in the country
- Accepting the registers of newly admitted members whom are assessed and admitted into the membership by each country branch
- Co-ordinating the branches located in different countries.

For this reason, the members of the Society of Professional Engineers (UK and International) who are MSPE/ FSPE/PEng(UK and International) are requested to serve as the leaders to form the country branches , one per each country excluding Singapore, Australia and Myanmar where we have got the branch administered by the organizations in those countries.

Only one branch and one person who will take the responsibility as Representative in each country. If there are more than one person, appropriate discussion and election is to be done to form a Executive Council

If required, our central administration will assist to provide the networking.

Membership Grades

The following grades will be given for newly elected members

1. Graduate Technical Engineer +Associate of The Society of Professional Engineers (UK and International) (GradTEng,ASPE(UK & International)

(Requirement- Advanced Diploma/ Higher Diploma in Engineering or BTech in Engineering) Graduates.

2. Graduate Professional Engineer +Associate of The Society of Professional Engineers (UK and International) (GradPEng,ASPE(UK & International)
(Requirement- Advanced Diploma/ Higher Diploma in Engineering or BTech in Engineering) Graduates.
3. Technical Engineer + Associate of The Society of Professional Engineers (UK and International) TEng,ASPE(UK & International)can also be issued for experienced Engineers who have not got BE degrees.
4. Professional Engineer, Member/ Fellow of The Society of Professional Engineers (UK and International) (PEng,MSPE/FSPE (UK & International)
(Refer the current membership admission procedure on application pack)

Tasks of Each Country Branch

- Assess the membership
- Collect the admission fees and annual subscription
- Use this fund for functions ,development and professional development activities administered by each branch
- Issue the membership certificates
- Send the list of members to Central Administration Quarterly

Registration Format/ Membership Number

All SPE (UK) Members whom are given Life Members have their membership numbers begin with A. For example A10994 etc. We do not change this number and membership certificates

For new members admitted by each branch will have the membership numbers in the following format.

Graduate Technical Engineer

GTxxxxxx/20xx/Country

For example Anil Prasad , Graduate Technical Engineer, admitted in 2019 by the branch in India

Anil Prasad GT1/2019/India

His title will be Anil Prasad GTEng,ASPE(UK & International)

Graduate Professional Engineer

GPxxxxxx/20xx/Country

For example Maung Maung , Graduate Technical Engineer, admitted in 2019 by the branch in Myanmar

Maung Maung GP45/2019/Myanmar

His title will be Maung Maung GPEng,ASPE(UK & International)

Professional Engineer

Pxxxx/20xx/Country

For example Henry Cheng , Professional Engineer, admitted in 2019 by the branch in Singapore

Henry Cheng P12/2019/Singapore

His title will be Henry Cheng PEng,MSPE(UK & International)

Technical Engineer

Txxxx/20xx/Country

For example, Mr Netani Valu, Technical Engineer , admitted in 2019 by branch in Fiji or Central Administration if the branch has not existed in Fiji

Netani Valu T13/2019/Fiji/Central

Admission of fellow will also be the same system.

If the person is later transferred to Graduate to Member, New Registration Number and the Registration Number of first admission are will be recorded.

For example , Anil Prasad becomes PEng in 2023,

Anil Prasad P207/2023/India (GT1/2019/India)

Graduate Technical Engineer can become PEng as per the Membership Admission System of SPE (UK & International).

PEng Seal

Follow the seal procedure

Membership Certificate

The format in Word and PDF Version will be sent to the most responsible person of the branch in each country

Cross Border Admission

Each branch in each country can only admit a person who got residential address in the country. (Only residential address will be referenced for admission, there must be no restriction on nationality, immigration status etc)

Cross border admission is not allowed.

There must be only one branch in each country. If several organizations want to take the position, it will be their tasks to resolve the matter to form a branch.

Reciprocal Recognition and Standardization

It is to be mutually developed by the branches.

Admission of membership for the candidates where no branch exists in the country of residence

Central administration will do it

Financial Matter/ Membership Fees etc

Each branch can freely set the membership fees appropriate to their country situation and maintain the fund in accordance with the legal system of the respective country.

Unless fund transfer is needed for special purpose of the Central Office, no fund needs to be transferred to central administration.

Venue and financial account of Central Administration

The role of central administration is to co-ordinate the branches which will have equal authority . For this reason, only online system will be kept and no central financial account will be set.

For necessary fund transfer, only the account of our representative will be given. But our function is to be based on each branch mainly, financial control by central administration is unnecessary.

Request

All current PEng,MSPE/FSPE (UK and International) members are requested to send me your wish to establish the branch in your country.

No proposal will be accepted for Singapore, Australia and Myanmar where SPE(UK & International) have already had a branches.

Dr Peter Prasad

Executive Officer

The Society of Professional Engineers UK and International
